Dear colleagues and students,

I would like to welcome you all to the new Academic Year 2014-2015.

Each academic year begins following the previous academic endeavors and goes on with renovated strength to the development of knowledge, skills and clear vision.

Knowledge is the motto of our era and the development of any country is impossible without it; as pushing the frontiers of knowledge and promoting genuine learning and understanding is the essence of any movement aiming at development and erudition.

The one who inspires and guides this movement -with a superior status- is teachers and educators.

Students of SRTTU whose ultimate goal is becoming a teacher, have to appreciate the value of themselves as they are honored to become teachers in the future; and have to appreciate the value of their teachers, as they guide them in this path.

At the present time, it is essential for us all to have trust in Allah and bless our souls to have a prosperous country in the future. To attain such a goal, we have to put collaboration and mutual understanding on the top of the agenda and then formulate and implement our plans as Allah says:

\[ \text{That man can have nothing but what he strives for} \]

\[ \text{An-Najm, 39} \]

For the realization of SRTTU’s prospect, as a cornerstone of educational development especially in technical and vocational domain, our academic community should cherish kindness and collaboration. We then need to develop the strategic planning to complete the university’s mission and become a leading university in promoting entrepreneurship and knowledge production nationwide.

In this journey, I need your valuable help and close cooperation.
